 MG PUBLIC SCHOOL

High School(CBSE)

Completed in 2019

About Me

Hi, My name is Abhinav and I enjoy creating things that live on the internet. I'm a computer science student who is passionate about contributing to open source.

My extensive hands-on experience in computer science engineering, coupled with a proven track record of tackling complex technical challenges, sets me apart as the ideal candidate for this role.

I have a deep passion for staying at the forefront of technology trends, which fuels my drive to innovate and excel in this field. My commitment to continuous learning, strong problem-solving skills, and ability to collaborate effectively make me a valuable asset to any team."

Projects

Tour Guide

Key Point About Project:

In this we can make a Custom package
Create it using language (Html, Css & JavaScript)

- This is a tour guide website where people can choose holiday packages in this i have also used flight api to fetch flight data

Help User to select a Place where they want to go and also recommend a hotels and famous places

Restaurant Book Order Template

Key Points:

- Create Using Html & CSS And also Upload it on Node server
- This is a webserver created by me to host a restaurant website

User can check the price and food which we listed on it

#Grocery app design

design the app in which we can buy the grocery and also check the live location .

Keep in the mind that user like the app interface and there experience is good with the app

CERTIFICATION

-Learn JAVA (Codecademy)

-Penetration Testing (Coursera)

-Cyber Threat Intelligence(Coursera)

-Introduction to UI and UX Design(codecademy)
